Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-26, drawn to transmitting narrowband information over a broadband network, classified in class 370, subclass 356.
 - II. Claims 27-30, drawn to fault restoration of a broadband network interface, classified in class 370, subclasses 216+ and 242+.
 - III. Claims 31-37, drawn to handling an upgrading operation of two call servers in a broadband network, classified in class 709, subclasses 221-222.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II and III have separate utility such as restoring the operation of a broadband network due to faults and reconfiguring the operation of a broadband network, respectively. See MPEP § 806.05(d). Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
3. A telephone call was made to William Lee, Jr. (Reg. No. 26,935) on January 12, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR

Art Unit: 2664

1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
